

Sep. 7, 2015, 13:30 – 17:45

|       |                                                                                           |                                                              |
|-------|-------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| 13:30 | Opening remarks                                                                           | Prof. Kiyomi Kakiuchi, Dean of GSMS, NAIST, Japan            |
| 13:35 | Integrating Photodriven Charge Separation<br>with Catalysis for Artificial Photosynthesis | Prof. Michael R. Wasielewski , North Western University, USA |
| 14:25 | Chiroptical Probing and Chiroptical Amplification                                         | Prof. Subi Jacob George, JNCASR, India                       |
| 15:00 | Primary Charge-separation Mechanism in the Photosynthetic Reaction Center                 | Prof. Yasuhiro Kobori, Kobe University, Japan                |
| 15:35 | coffee break                                                                              |                                                              |
| 16:00 | Recent Progress in Subporphyrin Chemistry                                                 | Prof. Atsuhiko Osuka, Kyoto University, Japan                |
| 16:50 | Photoswitchable Fluorescent Diarylethene Molecules and Crystals                           | Prof. Masahiro Irie, Rikkyo University, Japan                |
| 17:40 | Closing Remarks                                                                           | Prof. Tsuyoshi Kawai, NAIST, Japan                           |
