

■ Preface ■

Towards the Further Advancement of the Japanese Photochemistry Association

(Graduate School of Engineering, Osaka Prefecture University) Kazuhiko MIZUNO ..... 1

■ Note ■

Editorial Committee ..... 2

■ Review ■

Synthesis of photocatalytic materials using a solvothermal method

(Faculty of Science and Engineering, Kinki University) Hiroshi KOMINAMI ..... 3

Lanthanide nanocrystals having photo-magnetic properties

(Graduate School of Materials Science, Nara Institute of Science and Technology) Yasuchika HASEGAWA ..... 11

Chemical reaction dynamics induced by intense laser fields

(Quantum Beam Science Directorate, Japan Atomic Energy Agency and School of Science,  
The University of Tokyo) Ryuji ITAKURA and Kaoru YAMANOUCHI ..... 19

■ Topic ■

Control of the optical properties and nanostructures of perylene bisimides by hydrogen bonds

(Graduate School of Engineering, Chiba University) Shiki YAGAI ..... 27

Novel laser applications to stimuli-responsive polymers

(Graduate School of Science, Hokkaido University) Yasuyuki TSUBOI and Noboru KITAMURA ..... 32

In situ observations of photocatalytic reaction by photoacoustic spectroscopy

(Faculty of Engineering, Kyushu Institute of Technology and Catalysis Research Center,  
Hokkaido University) Naoya MURAKAMI, Teruhisa OHNO and Bunsho OHTANI ..... 37

■ Trend ■

Control of the hierarchical structure of oxide semiconductor photocatalysts

(Catalysis Research Center, Hokkaido University) Fumiaki AMANO ..... 41

Development of fluorescent dyes in the near-infrared region

(Nagahama Institute of Bio-Science and Technology) Shin-ichi SASAKI ..... 43

Development of Functional Chemiluminescent Dyes

(Faculty of Environmental Earth Science, Hokkaido University) Koji YAMADA ..... 45

■ Report ■

..... 47

■ Announcement ■

..... 51

■ Circular ■

..... 63
