

## Preface

- Rise and Fall of Photographic Films and Photochemistry  
(Frontier Core-Tech. Labs., FUJIFILM Corporation) Tadaaki TANI ..... 1

## Reviews

- Photomobile Polymer Materials – Amplification of Changes at a Molecular Level to Macroscopic Deformation –  
(Chemical Resources Laboratory, Tokyo Institute of Technology)  
Yumiko NAKA and Tomiki IKEDA ..... 3
- Gap-mode plasmon enhanced Raman spectroscopy at single crystalline metal surfaces  
(Hokkaido University and NIMS-MANA) Katsuyoshi IKEDA and Kohei UOSAKI ..... 10

## Topics

- Development of Near-IR Sensitive Dyes for Increasing Energy Conversion Efficiency of Organic Photovoltaics  
(Research Center for Advanced Science and Technology, The University of Tokyo)  
Jotaro NAKAZAKI and Hiroshi SEGAWA ..... 15
- Photochemistry in Polymer Thin-Film Solar Cells Studied by Transient Absorption Spectroscopy  
(Graduate School of Engineering, Kyoto University and PRESTO, Japan Science and Technology Agency)  
Shinzaburo ITO and Hideo OHKITA ..... 19
- Application of femtosecond near-IR spectroscopy to photochemistry  
– Observation of charge-separated intermediate state in photoinduced electron transfer reaction –  
(Research Centre for Spectrochemistry, School of Science, The University of Tokyo and Department of Chemistry, Faculty of Science, Gakushuin University) Tomohisa TAKAYA and Koichi IWATA ..... 23
- Ultrafast optical responses of carotenoid molecules  
(Graduate School of Science, Osaka City University and JST-CREST)  
Mitsuru SUGISAKI, Daisuke KOSUMI, Hideki HASHIMOTO ..... 28
- Photoactivation of molecular oxygen on solid surfaces  
(Kyoto University) Kentaro TERAMURA, Tetsuya SHISHIDO, Tsunehiro TANAKA ..... 35
- Application of Photoinduced Electron Transfer (PET) Reactions to Organic Synthesis  
-Recent examples utilizing photosensitization procedures-  
(Faculty of Science, Niigata University) Eietsu HASEGAWA ..... 40

Reports ..... 45

Circulars ..... 51

Announcements ..... 53
