

Preface

Your Job and Leisure

(Department of Polymer Chemistry, Kyoto University)

Shinzaburo ITO 1

Reviews

Photo-mediated regulation of gene functions with caged compounds

(Department of Biomolecular Science, Faculty of Science, Toho University)

Toshiaki FURUTA 2

Energy transfer and photochemical reaction of dendrimer molecules

(Graduate School of Pure and Applied Sciences, University of Tsukuba)

Yousuke MIURA, Tatsuo ARAI 9

Topics

Design of environmentally sensitive fluorescent nucleosides and their application to fluorescent DNA probes

(College of Engineering, Nihon University)

Yoshio SAITO 16

Auger Recombination Dynamics of Semiconductor Quantum Dots

(School of Science and Technology, Kwansai Gakuin University)

Yoichi KOBAYASHI, Naoto TAMAI 20

Supramolecular Structures and Photoelectronic Properties of the π -Complexes of Cyclic Porphyrin Dimers and Fullerene

(Institute for Materials Chemistry and Engineering, Kyushu University,
Graduate School of Science, Osaka University)

Fumito TANI, Hirofumi NOBUKUNI 24

Construction of organic-based heterogeneous photocatalysts using mesoporous organosilicas

(Inagaki Special Research Lab., Toyota Central R&D Labs. Inc., CREST/JST)

Hiroyuki TAKEDA, Shinji INAGAKI 28
