

Preface

Exit-oriented basic research and basic research set from exit

(School of Engineering, The University of Tokyo)

Kazuhito HASHIMOTO..... 49

Reviews

Visible phenomena utilizing photoisomerization of azobenzene

(Electronics and Photonics Research Institute, National Institute of Advanced Industrial Science and Technology (AIST))

Yasuo NORITAKE..... 50

π -Electronic systems that exhibit stimuli-responsive circularly polarized luminescence

(College of Pharmaceutical Sciences, Ritsumeikan University)

Hiromitsu MAEDA..... 58

Photoconduction in organic thin films studied by time-resolved magnetophotoconductance

(Center for Fostering Innovative Leadership, Niigata University; Department of Chemistry,
MSU-Iligan Institute of Technology; Graduate School of Science and Technology, Niigata University)

Yusuke WAKIKAWA, Christopher E. AMBE, Tadaaki IKOMA..... 64

Topics

Far infrared stimulated emission between electronically excited states of diatomic molecules

(Department of Chemistry, Faculty of Science, Tokyo University of Science)

Koichi TSUKIYAMA..... 72

Photoinduced mass transport observed for azobenzene-based photochromic amorphous molecular materials

(Department of Applied Chemistry, Muroran Institute of Technology)

Hideyuki NAKANO..... 76

Smart control of biomolecular machines: Photocontrol of the motile property of motor proteins based on the photoisomerization of azobenzene

(Research Institute for Electronic Science, Hokkaido University)

Tsuyoshi FUKAMINATO, Takashi KAMEI, Nobuyuki TAMAOKI..... 80

Essay

Merits and demerits of copy-paste scandal

(Graduate School of Engineering, Osaka University)

Shunichi FUKUZUMI..... 84

Reports 86
