

Preface

Enhancing the Integrity of Scientific Research

(Graduate School of Materials Science, Nara Institute of Science and Technology)

Kiyomi KAKIUCHI65

Reviews

Enhanced photocatalytic activity of TiO₂-based materials prepared by sol-gel method

(Graduate School of Science and Engineering, Yamaguchi University)

Suzuko YAMAZAKI66

Magnetic field effect on the photochemical reaction of Flavins

(Graduate School of Science and Engineering, Saitama University)

Kiminori MAEDA74

Control of multiexciton dynamics using plasmonic nanostructures

(School of Science and Technology, Kwansai Gakuin University)

Sadahiro MASUO82

Topics

Photoinduced formation of functional surfaces on photochromic microcrystalline films

(Department of Materials Chemistry, Faculty of Science and Technology, Ryukoku University)

Kingo UCHIDA90

Visible-light controllable NO releasing compounds and their biological applications

(Graduate School of Pharmaceutical Sciences, Nagoya City University)

Hidehiko NAKAGAWA95

Supramolecular allosteric signal-amplification sensing based on the flexible polymer backbones

(Department of Applied Chemistry, Osaka University)

Gaku FUKUHARA99
