

## Preface

Promote the use of academic outcome to the photochemical related industries

(Technology Strategy Division Corporate R&D Headquarters KONICA MINOLTA, INC.)

Atsuo EZAKI ..... 145

## Reviews

Photon upconversion in molecular assembled systems

(Graduate School of Engineering, Kyushu University, JST-PRESTO)

(Graduate School of Engineering, Center for Molecular Systems, Kyushu University)

Nobuhiro YANAI, Nobuo KIMIZUKA ..... 146

Excited state characteristics of aza- and thio-substituted nucleic acid bases:

An application for photodynamic therapy

(Department of Chemistry and Biological Science, Aoyama Gakuin University)

Tadashi SUZUKI, Tasuku ISOZAKI ..... 154

## Topics

Photochemistry of folic acid

(Faculty of Engineering, Shizuoka University)

Kazutaka HIRAKAWA ..... 161

Microscopic study on strong interaction between dye molecule and localized surface plasmon

resonance by nano-structure control

(National Institute for Materials Science (NIMS))

Miharu EGUCHI ..... 165

Highly efficient organic photoreactions using flow microreactors

(Graduate School of Materials Science, Nara Institute of Science and Technology (NAIST))

Yasuhiro NISHIYAMA, Kiyomi KAKIUCHI ..... 169

Excited state dynamics in mesoscopic space as revealed by transient absorption microscopy

(Department of Applied Chemistry, Osaka University)

Tetsuro KATAYAMA ..... 173

Essay ..... 177

Report ..... 179

Announcements ..... 186
