

## Preface

Morality of Scientist

(Korea University, Department of Advanced Materials Chemistry)

Chyongjin PAC ..... 135

## Reviews

Recent advances in visible-light-responsive photochromic molecules

(School of Science and Engineering, Aoyama Gakuin University)

Katsuya MUTOH, Jiro ABE ..... 136

Reaction mechanism of photochromic crystal studied by X-ray crystal structure analysis

(Department of Chemistry, Tokyo Institute of Technology)

Akiko SEKINE ..... 144

Light intensity-dependence analysis of heterogeneous photocatalysis

—A hypothesis on kinetics for photocatalytic multielectron transfer processes

(Institute for Catalysis, Hokkaido University)

Bunsho OHTANI, Mai TAKASHIMA ..... 150

## Topics

Creation of Luminescent Organic Crystal Utilizing Crystal-phase Composite Interactions

(Graduate School of Engineering, Osaka Prefecture University)

Yasunori MATSUI, Eisuke OHTA, Hiroshi IKEDA ..... 158

Propeller Chirality

(Graduate School of Engineering, Osaka University)

Tadashi MORI ..... 163

Photo-responsive gels based on photo-dimerization reactions

(Department of Chemistry and Biotechnology, Yokohama National University)

Ryota TAMATE ..... 167

Essay

..... 171

Report

..... 172

Records

..... 182

Circulars

..... 184

Announcements

..... 185
