

## Preface

(President of Tokyo Instrument, Inc.)

Kenichi KAWAMURA..... 161

## Reviews

Recent progress in development of photocatalysts for visible-light-driven water splitting

(Graduate School of Engineering, Kyoto University)

Hajime SUZUKI, Ryu ABE ..... 163

Progress of dye sensitizers for dye-sensitized solar cells

(Graduate School of Engineering, Hiroshima University)

Keiichi IMATO, Yousuke OYAMA ..... 169

Electron Spin Polarization Imaging Method Applied for Elucidating Photon-to-Energy Conversion

Mechanism in Organic Thin Film Solar Cells

(Molecular Photoscience Research Center, Kobe University)

Yasuhiro KOBORI ..... 177

## Topics

How to produce triplet excited state without heavy atoms: spin-orbit charge transfer

(Tokyo Institute of Technology, School of Life Science and Technology)

Hideya YUASA, Yuki TSUGA ..... 185

Geometrical Dynamics in the Excited States of Thermally Activated Delayed Fluorescence Materials

(Department of Chemistry, Faculty of Science, Kyushu University)

Kiyoshi MIYATA, Masaki SAIGO, Ken ONDA ..... 189

Near-field spatial and spectral characteristics of two-dimensional plasmonic meso-structures

(School of Advanced Science and Engineering, Waseda University)

Keisuke IMAEDA, Kohei IMURA ..... 193

## Essay

..... 197

## Reports

..... 199

## Records

..... 211

## Announcements

..... 216
