

## Preface

Photochemistry to Face the Depletion of Living Resources

(Executive Directors, The Japanese Photochemistry Association;

College of Science and Engineering, Aoyama Gakuin University)

Jiro ABE ..... 1

## Reviews

Material Development of Near-Infrared Emitters and Their Application to High Performance OLEDs

(Graduate School of Engineering, Department of Applied Chemistry;

Center for Organic Photonics and Electronics Research (OPERA), Kyushu University)

Ryo NAGATA, Hajime NAKANOTANI, Chihaya ADACHI ..... 2

Visible-Light-Driven Water Oxidation Catalyzed by Transition Metal Complexes

(Niigata University, Institute of Science and Technology)

Yuta TSUBONOUCHI, Masayuki YAGI ..... 10

## Topics

Emergent Photocatalytic Activity of Rhodamines by Self-assembly

(Department of Applied Chemistry, Graduate School of Engineering, Osaka University)

Hajime SHIGEMITSU, Toshiyuki KIDA ..... 17

Observation of Photochemical Reaction of Molecules in Nano-Confined Liquid

Using Surface Forces Apparatus (SFA) Fluorescence Spectroscopy

(Institute of Multidisciplinary Research for Advanced Materials, Tohoku University)

Motohiro KASUYA ..... 21

Development of NIR-Absorbing Organometallic Dyes

(Graduate School of Natural Science and Technology, Kanazawa University)

Taniyuki FURUYAMA ..... 25

Essay

..... 29

Reports

..... 31

Circulars

..... 33

Announcements
